This image shows a blank, aged, cream-colored page, likely an endpaper or flyleaf of a book. The paper has a slightly textured appearance with some minor discoloration and small dark spots, possibly due to age or handling. A vertical crease is visible near the right edge, suggesting it was once part of a bound volume. The page is otherwise empty of any text or markings.

A vertical strip of aged parchment, likely a fragment from a larger document. It shows faint, dark, handwritten markings that are mostly illegible due to fading and the texture of the parchment. The strip is narrow and appears to be a section cut from a larger sheet.
